Introduction to C40 10,000 96 ACTIONS TO COMBAT CLIMATE CHANGE **AFFILIATED** C40 CITIES 000 1 in 12 PEOPLE **25**% WORLDWIDE **OF GLOBAL** GDP

CITIES

C40 Networks catalyze new, better and faster climate action by helping cities learn from one another

- Private Building Efficiency
- Municipal Building Efficiency
- New Building Efficiency
- Clean Energy

- Mobility Management
- Walking and Cycling
- Mass Transit
- Low Emission Vehicles
- Land Use Planning

- Sustainable Waste Systems
- Waste to Resources
- Food Systems

- Cool Cities
- Connecting Delta Cities
- Urban Flooding

Air Quality

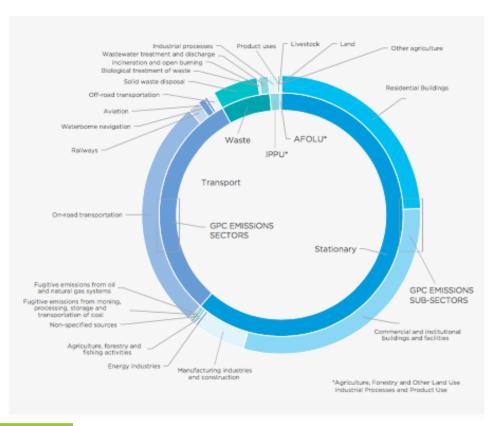

W&C Network cities are key to articulating this vision

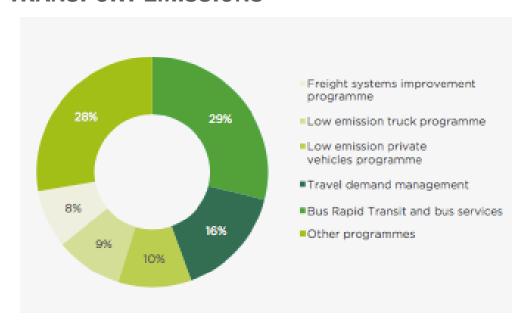

Network cities are accelerating a shift towards walking and cycling **COPENHAGEN** LONDON ROTTERDAM BARCELONA ROME SAN FRANCISCO BEIJING CHANGWON **TEL AVIV** MADRID **NEW ORLEANS** HOUSTON WUHAN NANJING DUBAI AMMAN **CDMX** KARACHI **GUANGZHOU** LAGOS ACCRA CHENNAI MEDELLÍN **NAIROBI** BOGOTÁ DAR ES SALAAM LIMA **TSHWANE JOHANNESBURG RIO DE JANEIRO AUCKLAND** DURBAN **CAPE TOWN BUENOS AIRES** SANTIAGO

Research highlights the need to tackle motorised transport

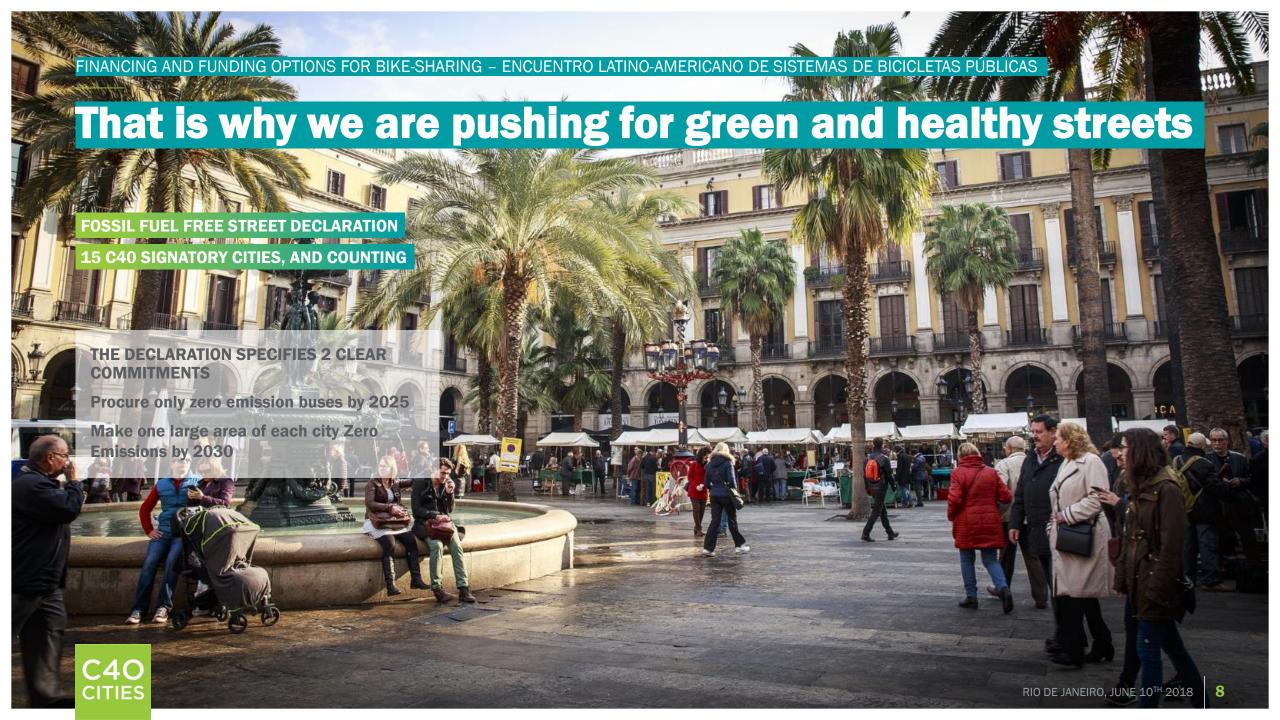

ONE THIRD OF C40 CITIES' EMISSIONS COMES FROM TRANSPORT

ACTIVE MOBILITY COULD SAVE UP TO 28% OF TRANSPORT EMISSIONS

IMPLEMENTING PARTNERS

THE QUINTO CENTENARIO CYCLE AVENUE

- 25 km cycle avenue, 34,000 trips in peak hours
- Currently undergoing feasibility studies
- Aiming to develop an innovative financing and funding model for cycling infrastructure

Support to NAMA TANDEM in Colombia

- NAMA TANDEM: 17 CITIES.
- IMPLEMENTED BY FINDETER, ON BEHALF OF COLOMBIAN GOVERNMENT

- 1: Parking space management schemes for automobiles
- 2: Low-speed zones
- 3: Bicycle parking spaces in multimodal nods
- 4: Private bicycle parking spaces
- 5: Construction and rehabilitation of bicycle lanes
- 6: Public bicycle systems
- 7: Formal bicycle taxi services
- 8: Electrically assisted bicycles

- **4.** FUNDING OPTIONS FOR BIKE-SHARING
- **5.** POLITICS OF BIKE-SHARING

Financing options for bike-sharing

COST-EFFECTIVE AND IMPORTANT BENEFITS

- London, in theory: 'will cover its operating costs within 2-3 years and will then contribute to its capital costs.'
 - London Cycling Campaign: "It is very likely they will make some kind of profit on this" as opposed to every single bus and tube journey.
- London, in practice: £130m in capital investments between 2010-2017. <u>Subsidy is regressive</u>.
- PUBLIC BICYCLE SCHEMES REQUIRE SUBSTANTIAL INVESTMENTS IN THEIR SET-UP AND OPERATION, ESPECIALLY IN THE START-UP PHASE
- Mix of supranational, national, municipal grants (e.g. TIF in Chicago, soft loan from Goldman Sachs in NYC)

PUBLICLY OWNED AND OPERATED

- FULL CONTROL, CAN MEET MULTIPLE OBJECTIVES
- BUT: REQUIRES CAPACITY, CORE BUSINESS?

PUBLICLY OWNED, PRIVATELY OPERATED

- FLEXIBLE, BUILDS MARKET
- BUT: CONTRACTUALLY DIFFICULT, GUARANTEES

PRIVATELY OWNED AND OPERATED

- NO FINANCIAL RISK; EFFICIENCY
- BUT: EQUITY, REDUCED CONTROL, MAY NOT MEET TRANSPORT REOUIREMENTS

Financing options for bike-sharing

FOLLOW-UP QUESTIONS:

- Future sources of financing? Earmark revenues from environmental taxes/fines/charges? Bonds (general or project)? Development banks? <u>But such mechanisms for financing infrastructure projects are often not designed for such small amounts</u>.
- How to keep justifying capital investment in the face of competition from new private actors?
- How to justify higher capital investment in more complex technology (e.g. pedelecs)?
- What is the opportunity cost of investing in a PBS instead of cycle infrastructure?

- **4.** <u>FUNDING OPTIONS FOR BIKE-SHARING</u>
- **5.** POLITICS OF BIKE-SHARING

Funding options for bike-sharing

- IMPORTANCE OF COMPREHENSIVE BUSINESS MODEL, WITH CONTINGENCIES (E.G. AROUND USAGE, PRICE STRUCTURE)
- London underwent a significant change/simplification of its user fee structures in 2016
- REGULATORY CHANGE TO ENSURE LONG-TERM SUSTAINABILITY OF PROJECT - DEDICATED FUNDING, MUNICIPAL STAFF IN CHARGE
- Risk of termination due to change in administration or bankruptcy

USER FEES

- VARY IMMENSELY, GENERALLY NOT SUFFICIENT TO COVER OPERATING COSTS AND CERTAINLY NOT TO ALSO RECOUP CAPITAL COSTS

SPONSORSHIP

- LONDON: \$10M A YEAR + ACTIVATION FUND
- NYC: \$9.5M A YEAR
- BARCELONA: \$1.7M A YEAR

SUBSIDY

- GENERALLY REQUIRED, REGARDLESS OF POLITICAL STATEMENTS
- **LONDON: 20-40% SINCE INCEPTION**

Funding options for bike-sharing

FOLLOW-UP QUESTIONS:

- Future sources of funding? Congestion charges? Land value capture? Earmark revenues from environmental taxes/fines/charges? <u>But such mechanisms for funding infrastructure projects are difficult to design</u> <u>effectively and efficiently</u>.
- How to keep justifying subsidy in the face of competition from new private actors?
- How to attract sponsors? There has been some backlash when selecting past sponsors (e.g. Barclays in London). Also, what if system is not successful and image of sponsor is damaged?
- What is the opportunity cost of funding a PBS instead of e.g. repairing cycle infrastructure?

- **4.** FUNDING OPTIONS FOR BIKE-SHARING
- **5.** POLITICS OF BIKE-SHARING

Politics of bike-sharing

LONDON SCHEME PLANNED IN 2008 (KEN), THEN FINALISED IN 2010 (BORIS). SANTANDER CYCLE HIRE STILL REFERRED TO AS 'BORIS BIKES'.

EXPLOSION OF BIKE-SHARING SYSTEMS IN ITALY AND SPAIN, WITH MIXED SUCCESS

CITI BIKE: PRIVATELY-OWNED, PRIVATELY-OPERATED, HIGH COSTS. EQUITY?

THANK YOU!
